

# WipeOutGraffiti

With IFS Anti-graffiti Powder Coatings

**IFS anti-graffiti coatings have been specially formulated to aid in the removal of unwanted graffiti from metal surfaces.**

Removing unwanted graffiti is challenging, time consuming and expensive. With that in mind, the IFS R&D team has created a high quality powder coating that significantly helps with the removal of graffiti, using common solvents.

Available in polyurethane, epoxy and modified polyester TGIC technology, these coatings not only have first class anti-graffiti properties, but they benefit from good chemical and stain resistance and they look great. The power of IFS anti-graffiti coating is also available as a clear coat. Choose IFS anti-graffiti coatings and wipe out unwanted graffiti.
