

IFS Powder for **ACE** Applications

IFS Powder for ACE Applications

Agricultural, Construction and Earth Moving Equipment (ACE) demands coatings that perform as tough and hardworking as the machines themselves. What can you expect from the IFS Coatings ACE program?

- World class formulators
- Innovative products
- Customization as standard
- ACE specialists
- Superior process expertise

Products

Choosing the right product, or right combination of products, is essential for the long term performance of your agricultural and construction equipment. We have many different chemistries and powder types available, and all IFS powder coatings can be customized to deliver the performance you need and the color you want. Some of the most popular in this market include:

incredible edge coverage and ensure a smooth, durable finish. IFS Super Durables deliver:

- Excellent exterior weathering
- Excellent chemical resistance
- High impact resistance and flexibility
- Excellent abrasion resistance
- Extremely cost effective
- Custom formulations with additional functionality available

IFS Standard Polyesters

The workhorse of the powder coatings world, IFS standard polyester powders provide an economical coating that also demonstrates good overbake resistance to yellowing. IFS Standard Polyester powders provide:

- Good exterior weathering
- Good chemical resistance
- High impact resistance and flexibility
- Good edge coverage
- A smooth finish
- Custom formulations with additional functionality available

IFS Powder Top-coats

IFS Super Durable Polyesters

Super durables are the superhero of exterior performance. Available in TGIC or TGIC-free formulations, these hardworking powders will deliver

IFS Powder Primers

Formulated around epoxy resins, IFS Primers are applied to properly pretreated metal and require a powder top coat to help provide the best in substrate protection.

IFS Primers will help deliver superior adhesion, improved edge coverage (including sharp edges) and additional corrosion protection to help slow the spread of rust from a cut that penetrates through the coating. Choosing an IFS primer can also improve chip resistance, sealing and smoothing, filling pits and cracks, and bridging onto bumps on a metal surface.

Talk to your IFS representative about the best primer for your application.

IFS Opti-Cure

An efficient coating process with savings in energy, time and money is at the heart of what we do. IFS Opti-Cure will ensure the optimum in process, performance and protection.

Created by IFS process and application experts, the IFS Opti-Cure program is intended to reduce operational footprint, energy costs and coating time, while ensuring optimal edge coverage, corrosion resistance and weatherability.

Opti-cure technology can deliver a cross linked primer and top-coat system that co-reacts and cures together in a single cure. Essentially, it's two coats of powder applied with only one cure cycle.

Talk to your IFS representative for more information on how IFS Opti-Cure can work for you.

IFS PureClad

IFS PureClad powder for heat sensitive substrates brings all the benefits of tough, protective powder to heat sensitive applications like the hydraulic assemblies of engine components.

Curing at significantly lower temperatures while maintaining the incredible protective qualities of a thermosetting finish, PureClad powders are available as a single coat or a primer-top coat solution. PureClad primers will accept a powder or liquid topcoat.

PureClad powder delivers:

- Excellent color & gloss retention
- Excellent stain resistance
- Excellent moisture & chemical resistance
- Maintains flexibility over time
- Good overbake stability
- Good edge outgassing forgiveness
- Good re-coatability
- Can be optimized for IR boost and cure

A World Of Color

With thousands of colors to choose from, including industry standards, RALs and ANSI/NSF tones our powders perform AND look superb. With a dedicated team of inhouse color matching experts, matching your brand palette is part of the IFS promise. Discuss changes in gloss, effect, texture and more with the team.

Choose IFS Coatings to protect ACE applications with a robust, durable, hard-wearing finish in a wide range of colors. **How do they perform? They "ACE" it!**
